

10 Benefits of Using a Home Care Agency

1. Homewatch CareGivers is backed by our parent organization with over 30 years of providing exceptional care. Independent experience is variable, and hard to verify.
2. With an independent caregiver, you are liable for any accident or emergency that could occur. We cover our caregivers with Occupational Accident Insurance, so if there is an incident, we are there for you.
3. Homewatch CareGivers provides ongoing training for all of our caregivers, a benefit that most individual caregivers do not have access to.
4. All of our caregivers are bonded and insured. It is nearly impossible to find an independent caregiver who can promise this.
5. With an individual caregiver, there is no quality control. At Homewatch CareGivers, we monitor and update our families on the status of their cases regularly.
6. Homewatch CareGivers provides extra staff in case of an emergency or a no-show. Individual caregivers never have backup support.
7. Our caregivers are our employees, and they are taxed appropriately. Individual independent caregivers rely on you to handle their taxes and withholdings.
8. All of the caregivers at Homewatch CareGivers are thoroughly background checked. With an independent, it is your responsibility to research and pay for any checks you want to do on the caregivers.
9. Homewatch CareGivers is available 24 hours a day, 365 days a year. No private individual could ever be that available.
10. Our clients are our first priority. We make every effort to carefully match them with the best caregivers for their needs. If there is a problem with an independent caregiver, you would need to start the hiring process from zero.

**Homewatch CareGivers is a home care agency that you can trust.
